Intended Use of this Document

This document is incorporated by reference into the Microsoft Volume Licensing Agreement under which you are acquiring product licenses.

Among the products available to you under your agreement are products that provide users with services through software features that connect with Microsoft or service provider computer systems over the Internet. The table below identifies these software features and the products in which they are found. It provides a description of the features and links to additional information.

For more general information regarding your access to services provided with the products, see the [Microsoft Product Use Rights](#), Microsoft Online Services Use Rights or other use rights document under your licensing agreement, as appropriate.

For More Information

- Microsoft Product Use Rights (PUR) document: <http://www.microsoft.com/licensing/about-licensing/product-licensing-overview.aspx>
- Microsoft Online Services Use Rights document: <http://www.microsoftvolumelicensing.com/DocumentSearch.aspx>
- Volume Licensing Agreements — please contact your Microsoft Volume Licensing account manager.

For Office 365 products and online services

For information on these software features for the Office 365 products and online services listed below, please review the Office 365 Privacy & Security Supplement at: <http://go.microsoft.com/fwlink/?LinkID=212058&clid=0x409>.

- Office 365 Pro Plus
- Office 365 Developer
- Office 365 Small Business
- Office 365 Small Business Premium
- Project Pro for Office 365
- Visio Pro for Office 365

Automatic Updates	This software contains an Automatic Update feature that is on by default. You may turn off this feature while the software is running ("opt out"). Unless you expressly opt out of this feature, this feature will (a) connect to Microsoft or service provider computer systems over the Internet, (b) use Internet protocols to send to the appropriate systems standard computer information, such as your computer's Internet protocol address, the type of operating system, browser and name and version of the software you are using, and the language code of the device where you installed the software, and (c) automatically download and install, or prompt you to download and/or install, current Updates to the software. In some cases, you will not receive a separate notice before this feature takes effect.	<ul style="list-style-type: none"> • Lync 2010 (pertains to Microsoft Silverlight software) 	<p>Microsoft Silverlight Privacy Statement: http://go.microsoft.com/fwlink/?LinkId=178857</p>
Automatic Updates	To help keep the software up-to-date, from time to time the software connects to Microsoft or service provider computer systems over the Internet. In some cases, you will not receive a separate notice when they connect. When the software does so, we check your version of the software and recommend or download updates to your devices. You may not receive notice when we download the update. You may switch off this feature.	<ul style="list-style-type: none"> • Forefront ThreatManagement Gateway, Medium Business Edition and Web Antimalware Subscription for Forefront Threat Management Gateway, Medium Business Edition 	<p>Forefront TMG MBE Privacy Statement: http://www.microsoft.com/forefront/edgesecurity/isaserver/en/us/tmg-mbe-privacy-statement.aspx</p>
Customer Experience Improvement Program (CEIP)	This software uses CEIP. CEIP automatically sends Microsoft information identifying the installed Microsoft product, the operating system of the device, the CPU architecture of the operating system and data regarding the success or failure of the installation. Microsoft does not use this information to identify or contact you.	<ul style="list-style-type: none"> • VS 2012 Ultimate, Premium, Professional, Test Professional & Team Foundation Server 	<p>To learn more about CEIP, see http://go.microsoft.com/fwlink/?LinkID=248251</p>

	<p>including instructions for to turning it off, see http://go.microsoft.com/fwlink/?LinkID=248251. You may turn off this automatic update feature while the software is running ("opt out"). Unless you expressly opt out of this feature, this feature will (a) connect to Microsoft or service provider computer systems over the Internet, (b) use Internet protocols to send to the appropriate systems standard computer information, such as your computer's Internet protocol address, operating system, the name and version of the software you are using and language code of the device where you installed the software, and (c) prompt you to download and/or install, current updates to Visual Studio or other third party software. In some cases, you will not receive a separate notice before this feature takes effect. By installing the software, you consent to the transmission of standard computer information.</p>		
Extension Manager	<p>The Extension Manager can retrieve other software through the internet from the Visual Studio Gallery website. To provide this other software, the Extension Manager sends to Microsoft the name and version of the software you are using and language code of the device where you installed the software. This other software is provided by third parties to Visual Studio Gallery. It is licensed to users under terms provided by the third parties, not from Microsoft.</p>	<ul style="list-style-type: none"> • Visual Studio (with and without MSDN) 	<p>See the Visual Studio Gallery terms of use for more information.</p>
Groove Software and Services	<p>For software that includes it, Groove will allow you to communicate directly with others over the Internet. If you are not on the Internet, your communications will be encrypted and sent through Microsoft servers for later delivery. You cannot disable this service.</p> <p>Groove makes some information about your Groove account and computer known to your contacts. For example, if you:</p> <ul style="list-style-type: none"> • add a contact to your contact list, • import your user account onto a new device, • update the information in your "identity contact", or • send a Groove workspace invitation using an URL to reference the invitation file, information about you and your devices may be sent to your contacts. If you configure Groove to use Microsoft servers, those servers will collect information about your computers and 	<ul style="list-style-type: none"> • Visual Studio with MSDN (related to Office) 	<p>Office 2010 Privacy Statement: http://office.microsoft.com/en-us/privacy-statement-for-microsoft-office-2010-HA101098562.aspx</p>

Feature	Description	Products	Where to look for more information
	user accounts.		
IPv6 Network Address Translation (NAT) Traversal service (Teredo)	<p>Each time you start your licensed computer, Teredo will attempt to locate a public Internet Protocol version 6 (IPv6) service on the Internet. This occurs automatically when your licensed computer is connected to a public or private network, but does not occur on managed networks such as enterprise domains. If you use a program that requires Teredo to use IPv6 connectivity, or if you configure your firewall to always enable IPv6 connectivity, then Teredo will periodically contact the Microsoft Teredo service over the Internet. The only information sent to Microsoft is standard computer information and the name of the service requested (for example teredo.ipv6.microsoft.com). The information sent from your computer by Teredo is used to determine if your computer is connected to the Internet and if it can locate a public IPv6 service. Once the service is located, information is sent to maintain a connection with the IPv6 service.</p>	<ul style="list-style-type: none"> Windows 8 	<p>Windows 8 Privacy Statement: http://go.microsoft.com/fwlink/?linkid=190175</p>
IPv6 Network Address Translation (NAT) Traversal service (Teredo)	<p>This feature helps existing home Internet gateway devices transition to IPv6. IPv6 is a next generation Internet protocol. It helps enable end-to-end connectivity often needed by peer-to-peer applications. To do so, each time you start up the software the Teredo client service will attempt to locate a public Teredo Internet service. It does so by sending a query over the Internet. This query only transfers standard Domain Name Service information to determine if your computer is connected to the Internet and can locate a public Teredo service. If you use an application that needs IPv6 connectivity or configure your firewall to always enable IPv6 connectivity by default standard Internet Protocol information will be sent to the Teredo service at Microsoft at regular intervals. No other information is sent to Microsoft. You can change this default to use non-Microsoft servers. You can also switch off this feature using a command line utility named "netsh".</p>	<ul style="list-style-type: none"> MSDN * Visual Studio with MSDN* Windows HPC Server 2008 R2 Windows Multipoint Server 2012 and 2011 Standard & Premium Windows Server 2012 (all editions) Microsoft Windows Small Business Server 2011 Essentials Windows Small Business Server 2011 Premium Add-on and Standard 	<p>For Windows Multipoint Server: http://go.microsoft.com/fwlink/?LinkId=245855</p> <p>Windows 7 Privacy Statement: http://windows.microsoft.com/en-US/windows7/windows-7-privacy-statement</p> <p>Windows Server Privacy Highlights http://go.microsoft.com/fwlink/?linkid=101128</p>
Information Rights Management	<p>The software contains a feature that allows you to create content that cannot be printed, copied or sent to others without your permission. You may need to connect to Microsoft to use this feature for the first time. Once a year, you may need to re-connect to Microsoft to update</p>	<ul style="list-style-type: none"> SharePoint Server 2013 Office 2013 (and component products) 	<p>http://www.office.microsoft.com/en-us/assistance/HA010397891033.aspx or o15.officeredir.microsoft.com/r/rlidIRMHelp?clid=1033</p>

SuperPreview	<p>The software contains access to a pre-release online service that allows you to do the following:</p> <ul style="list-style-type: none"> • use certain browsers to preview existing web pages, • to view your newly created webpages, and • view webpages on your local intranet. <p>When the SuperPreview client application starts it will always attempt to contact the SuperPreview online service through a process called "Discovery". If the SuperPreview client is signed up with the online service, discovery will return both the list of available remote browsers with icons and a list of disabled browser versions that are known to not work with SuperPreview. Discovery will return results depending on the configuration of the SuperPreview client. Once discovery returns information to the SuperPreview client, the user-interface of the SuperPreview client may be updated if changes occurred. A modal dialog will appear, notifying you of the following:</p> <ul style="list-style-type: none"> • what changes took place, and • whether a browser was added, removed, or updated. <p>For web pages on your local machine, and for sites identified as being part of an intranet, the SuperPreview client creates a zip package of the web page you are attempting to preview. This includes all assets associated with that page (css, images, js, etc). The SuperPreview client then transmits this package to the online service. The online service then extracts the package to temporary space and previews the page with the remote browsers selected by the SuperPreview client. After previewing is complete the package is deleted from the temporary space. The online service will then return to the SuperPreview client an image render and positioning data as described above.</p>	<ul style="list-style-type: none"> • Expression Studio 4 	<p>For information on SuperPreview see: http://expression.microsoft.com/en-us/dd565874.aspx</p>

URL Filtering	This feature identifies certain types of web sites based upon predefined URL categories. It allows you to deny access to such web sites, such as known malicious sites and sites displaying inappropriate or pornographic materials. To apply URL filtering, Microsoft queries the online Microsoft Reputation Service for URL categorization. You can switch off this feature.	<ul style="list-style-type: none"> • Forefront Threat Management Gateway 2010 Standard and Enterprise Editions 	TMG Privacy Statement: http://go.microsoft.com/fwlink/?LinkId=130980
Volume Activation Management Tool	When you install Volume Activation Management Tool ("VAMT"), it may activate the use of Windows Server 2008, Windows Vista, Windows Server 2008-R2 or Windows 7 with a specific physical hardware system ("Device"). During activation, VAMT will send information about Windows Server 2008, Windows Vista, Windows Server 2008-R2, or Windows 7 and Device(s) to Microsoft. This information includes the version, language and product key of the software, the Internet protocol address of the system running VAMT, and information derived from the hardware configuration of the Device(s) running Windows Server 2008, Windows Vista, Windows Server 2008-R2, or Windows 7. The information sent to Microsoft does not represent any personal information. This information cannot be used to determine the make or model of the device(s) and it cannot be backward calculated to determine any additional information about your device(s).	<ul style="list-style-type: none"> • Use of the Windows Automated Installation Kit (WAIK) in the following: System Center 2012 Configuration Manager, System Center 2012 Datacenter, System Center 2012 Standard 	System Center Privacy Statement: http://go.microsoft.com/fwlink/?LinkId=244334
Web Content Features	Features in the software can retrieve related content from Microsoft and provide it to you. To provide the content, these features send to Microsoft the type of operating system, name and version of the software you are using, type of browser, and language code of the device where you installed the software. Examples of these features are clip art, templates, online training, online assistance, and Appshelp. You may choose not to use these web content features.	<ul style="list-style-type: none"> • Office 2010 (including Office Professional Plus Subscription) and component products • Visual Studio (with and without MSDN) • Windows HPC Server 2008 R2 • Windows Multipoint Server 2012 and 2011 Standard & Premium • Windows FLP • Windows Server 2012 (all editions) • Microsoft Windows Small Business Server 2011 Essentials 	For Windows Multipoint Server: http://go.microsoft.com/fwlink/?LinkId=245855 Windows Server Privacy Highlights: http://go.microsoft.com/fwlink/?linkid=101128 Office 2010 Privacy Statement: http://office.microsoft.com/en-us/privacy-statement-for-microsoft-office-2010-HA101098562.aspx

Windows Media Digital Rights Management	Content owners use Windows Media digital rights management technology (WMDRM) to protect their intellectual property, including copyrights. This software and third party software use WMDRM to play and copy WMDRM-protected content. If the software fails to protect the content, content owners may ask Microsoft to revoke the software's ability to use WMDRM to play or copy protected content. Revocation does not affect other content. When you download licenses for protected content, you agree that Microsoft may include a revocation list with the licenses. Content owners may require you to upgrade WMDRM to access their content. Microsoft software that includes WMDRM will ask for your consent prior to the upgrade. If you decline an upgrade, you will not be able to access content that requires the upgrade. You may switch off WMDRM features that access the Internet. When these features are off, you can still play content for which you have a valid license.	<ul style="list-style-type: none"> • Expression Studio Professional Edition* • MSDN* • TechNet Plus* • Visual Studio with MSDN* • Windows FLP • Windows HPC Server 2008 R2 • Windows Multipoint Server 2012 and 2011 Standard & Premium • Windows Server 2012 (all editions) • Microsoft Windows Small Business Server 2011 Essentials • Windows Small Business Server 2011 Premium Add-on and Standard 	<p>For Windows Multipoint Server: http://go.microsoft.com/fwlink/?LinkId=245855</p> <p>Windows 7 Privacy Statement: http://windows.microsoft.com/en-US/windows7/windows-7-privacy-statement</p> <p>Windows Server Privacy Highlights: http://go.microsoft.com/fwlink/?linkid=101128</p>
