Overview

centron offers a powerful compute, network and storage platform to achieve your cloud goals or those of your customers.

centron ccloud³ offers you all the features with all the conveniences you need for your cloud - VM deploy within seconds, snapshots, monitoring & more. Try it now at <https://ccenter.internet1.de/>

Support your IT with Premium Managed Services

VMs for every need

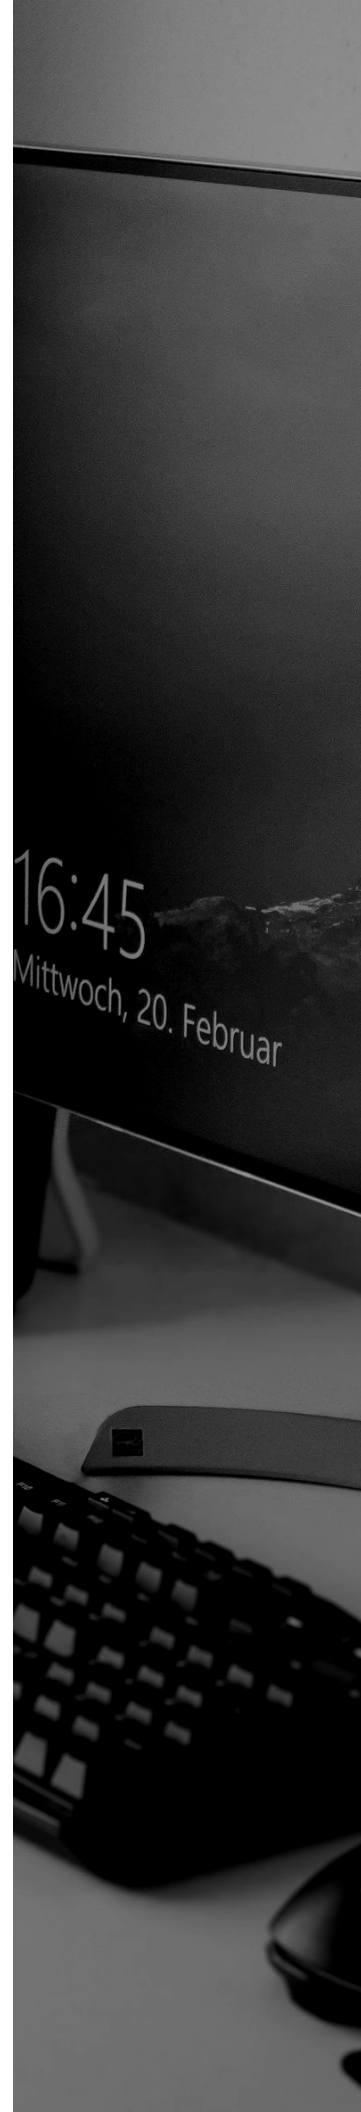

- Performance Pool for high performance computing (Intel Xeon >3.5 GHz)
- Worker Pool for general purpose computing (AMD EPYC Rome 2.8 GHz - 3.4 GHz)
- High Availability for absolute reliability
- GPU optimized for machine learning & real-time data processing

Better planning through transparent pricing

You only pay for the resources you actually use. Your use of ccloud³ resources is analyzed every minute and billed at the end of the month via the credit system.

GDPR compliant

In centron's ISO 27001 certified data center in Hallstadt, Germany, your data is processed in compliance with DSGVO as well as our own data security standards. Due to the location in Germany, your data is also protected from the US Cloud Act.

Managed Infrastructure - A prime example

The synergies between your individual products and services enable you to achieve the highest added value for your managed infrastructure.

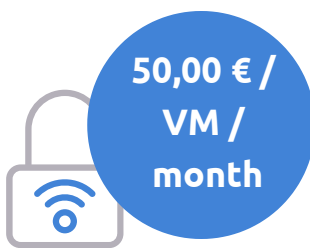

centron ccloud³

Agile and secure Infrastructure-as-a-Service solutions where you only pay for what you actually use.

Managed Firewall

A managed firewall from centron provides you with a maximum of individualized security - without any effort.

centron PFM

Premium Full Managing upgrades your ccloud³ infrastructure with backups, monitoring and patch management to help you save cash and be more agile.

centron PMS

With centron Premium Managed Services you outsource your entire IT. centron takes care of your entire infrastructure in a resource-based hourly quota.
